# Lexmark Translation Assistant

Real-time document language translation at your fingertips

Overcome language barriers and communication challenges

More and more, organizations need to communicate with people who speak different languages. Businesses, schools and government agencies face difficult challenges when trying to translate documents — both hardcopy and electronic versions — into the native language of their customers, students, parents and constituents. It costs time and money to break the language barrier.

Translation Assistant provides real-time document translation for any business, school or government organization's Lexmark multifunction printer (MFP). Just scan documents in the original language using a Lexmark MFP, select the appropriate output language from several choices, and receive a translated document within seconds. The translated documents can then be printed or emailed directly to recipients, streamlining and improving communications with customers, students, parents and constituents.

Easy to use interface

Translate hardcopy documents in seconds

Convenient online portal for electronic documents

Requirements:

▸ Any Lexmark multifunction product (MFP) with a 4.3-, 7-, or 10-inch screen with a printer hard disk and latest firmware

▸ Device OCR (Optical Character Recognition) license must be valid

▸ The printer is enrolled in Lexmark™ Cloud Services with Translation Assistant subscription

✓ **Saves** time	✓ **Improves** communications
✓ **Easy & convenient** translation	✓ **Overcomes** language barriers

About Lexmark

Lexmark creates cloud-enabled imaging and IoT technologies that help customers worldwide quickly realize business outcomes. Through a powerful combination of proven technologies and deep industry expertise, Lexmark accelerates business transformation, turning information into insights, data into decisions, and analytics into action.

Supported formats

Output file formats:

- PDF
- DOCX

Notes:

- OCR processes PDF and DOCX documents differently and may produce different outputs.
- Translation Assistant works best with non-stylized text. For documents with graphics, PDF is the recommended format.
- Avoid using documents that include stylized, script or handwritten text or text that overlaps images.
